DANGEROUS GOODS HANDLING

Dangerous Goods are substances or items which have hazardous properties which can be dangerous if handles incorrectly. Some of the consequences of mishandling are:

- Explosion
- Burn
- Corrode
- Asphyxiate
- Poison
- Become unstable when mixed with certain other products

When Dangerous Goods are handled incorrectly, they can endanger people and the environment. With this in mind, laws have been procured to ensure the safe handling and transportation of Dangerous Goods. World Options prides itself on following the conditions set by the current Australian Dangerous Goods Code. Everybody in the Logistics Chain has roles and responsibilities relative to their role:

CONSIGNOR

A Consignor must supply certain information relative to the goods being sent:

- NAME
- CLASS and/or SUBSIDIARY RISK
- UN NUMBER
- NUMBER and TYPE OF PACKAGE
- QUANTITY
- EMERGENCY PROCEDURE GUIDE (EPG) or;
- TRANSPORT DOCUMENT and MATERIAL SAFETY DATA SHEET (MSDS)

World Options requires all of this information, listed above, before we will undertake a Dangerous Goods consignment.
